Отзывы к разделу "FoCOM Ford VCM OBD Software Focom 1.0.9419 download" Hi. I just got the F-COM version 2.0 which has been downloaded. Can anyone tell me if the F-COM version 2.0 plugs in at the same place as the FoCOM v1.0? Or is there another place it goes. I have not plugged it into the vehicle yet. Good afternoon, I just got the FoCom which plugs in at the same place. Gonna have to unplug it. Can I unplug it without wrecking the connector on the vcm side? Its a pretty expensive connector. Need to make sure its not going to chip up the cable on the connector.

Hi, I just got this program. But the question is if it works with 2015 model? I can get the VIN from the internet.

1. Field of the Invention
The present invention relates to a method for controlling the electrical supply to a hydraulic pump which is used for driving a hydraulic brake or clutch system of a vehicle such as an automobile.

2. Description of the Prior Art
A hydraulic system for actuating a braking device, such as a master cylinder of the brake system and a clutch pedal, requires that the pressure of fluid under a high pressure should be applied to the actuator for a sufficiently long time. On the other hand, a hydraulic system for operating an air-conditioning system of an air conditioner of the vehicle requires that the hydraulic pressure should not be applied to the actuator, such as a throttle valve, of the air-conditioning system for a short time. Therefore, the service type of brake system and clutch system in which the operation thereof can be manually performed, may be combined with a so called slip control type brake system (servo type brake system) and clutch system (automatic clutch system) in which the operation of the system can be automatically performed. In the automatic or servo type hydraulic brake and clutch system, the hydraulic fluid under a high pressure is often continuously supplied to the hydraulic actuator, so that the high pressure of fluid is unnecessarily applied to the hydraulic actuator for a relatively long time, by mistake. In addition, the hydraulic fluid under a relatively high pressure is unnecessarily supplied to the hydraulic actuator, due to a shortage

of the hydraulic fluid, which causes the excessive wear of
